

## FP 441

### **Features:**

- Excellent Impact Strength
- Closely controlled particle size
- Can be processed using either long or short curing techniques in boiling water

### **Benefits:**

- Hi Impact denture resins are designed to improve the biaxial flexural strength of dentures, which correlates to improve its reliability and durability.
- Highly accurate colour matching
- Extended working time

### **Typical Properties**

Makevale® Group Grades	FP 441
Median Particle Size (µ)	50 - 70
Residual Peroxide %	0.35 – 0.65
Solution Viscosity (Poise)	1.2 – 1.8
Recommended Liquid	Heat Cure Denture base or Heat Cure Clear Liquid
