

## FP 204

### **Features:**

- Closely controlled particle size
- Can be processed using either long or short curing techniques in boiling water

### **Benefits:**

- Tooth polymer resins are designed to make teeth.
- Highly accurate colour matching
- Quick dough time
- Extended working time

### **Typical Properties**

Makevale® Group Grades	FP 204
Median Particle Size ( $\mu$ )	40 - 50
Residual Peroxide %	0.2 - 0.3
Solution Viscosity (Poise)	1.75 - 2.75
Recommended Liquid	Tooth Monomer Liquid
